

ROHIT PANWAR

Senior Azure DevOps & Cloud Platform Engineer

Hyderabad, India · +91 9929202384 · rohitpanwar2025@outlook.com · English & Hindi

PROFESSIONAL SUMMARY

Results-driven Azure DevOps and Cloud Platform Engineer with 8.4+ years of hands-on experience designing, automating, and governing enterprise-scale Azure environments. Proven expertise in Infrastructure-as-Code (Terraform, ARM templates), CI/CD pipeline engineering with Azure DevOps and GitHub Actions, and Kubernetes-based container orchestration using AKS. Adept at enforcing Azure governance, RBAC, and security frameworks across complex financial services environments, with a strong track record of driving automation-first, DevOps and GitOps delivery practices that accelerate release velocity and ensure compliance at scale.

CORE TECHNICAL SKILLS

DevOps & IaC	Azure DevOps, GitHub Actions, Terraform, ARM Templates, Ansible (basic), PowerShell (intermediate), Bash, CI/CD Pipeline Design
Cloud & Platform	Azure IaaS/PaaS/SaaS, AKS, Azure App Services, Azure Functions, Logic Apps, API Management, Azure SQL, Cosmos DB, Azure Data Factory, Azure Virtual Desktop
Governance	Azure Policy, RBAC, Management Groups, Landing Zones, Cost Management, Resource Tagging, Azure Advisor, Blueprints, FinOps Principles
Networking	VNets, NSGs, UDRs, Azure Firewall, VPN Gateway, ExpressRoute, Private Link, Private Endpoints, Application Gateway, Azure DNS
Security & IAM	Azure Entra ID, Conditional Access, PIM, Key Vault, Defender for Cloud, Zero Trust, Workload Identity
Monitoring	Azure Monitor, Log Analytics, Application Insights, Sentinel, Alerts, Workbooks, Diagnostic Settings, SonarQube (basic)
Containers	Azure Kubernetes Service (AKS), Azure Container Registry, Docker, Containerisation & Orchestration
Migration	Azure Migrate, ASR, Lift & Shift, Rehost, Monolith-to-Microservices, AWS/GCP-to-Azure Migration
AI & Analytics	Azure OpenAI, Azure Data Factory, BI & Insights integration
Agile & Tooling	Jira (basic), Confluence (basic), Scrum/Kanban, Visio Architecture Diagrams, HLD/LLD, Well-Architected Framework

CERTIFICATIONS

- AZ-305 Microsoft Certified: Azure Solutions Architect Expert
- AZ-102 Microsoft Certified: Designing and Implementing an Azure AI Solution
- AZ-104 Microsoft Certified: Azure Administrator

PROFESSIONAL EXPERIENCE

Senior Azure DevOps & Cloud Engineer | Capgemini Technology India Services LimitedDec 2025 – Present
Client: Dai-ichi Life Insurance

- Standardised infrastructure provisioning using Terraform (IaC) with modular templates and secure remote state management, reducing environment setup time and eliminating configuration drift across Dev/UAT/Prod.
- Designed and executed Azure DevOps Build & Release pipelines end-to-end, enabling faster, error-free deployments and full traceability across all environments.

- Automated infrastructure and application deployments via CI/CD pipelines using Azure DevOps and GitHub Actions, significantly reducing manual intervention in the release process.
- Managed Azure DevOps repositories, enforced branch strategies, pull request governance, and access controls to ensure secure and structured code lifecycle management.
- Administered Azure DevOps organisation settings including service connections, agent pools, variable groups, and environment approvals, ensuring pipeline governance at scale.
- Managed GitHub Teams with role-based access controls and repository-level permissions, enhancing security and structured collaboration across development squads.
- Improved cloud reliability by proactively monitoring and resolving issues across Azure Storage (Blob, File, Queue, Table), App Services, and serverless workloads using Azure Monitor and Diagnostic Settings.
- Strengthened data platform stability by optimising Azure Data Lake Storage access controls and resolving big data processing issues with Azure Data Factory (ADF) workflows and triggers.
- Enhanced end-user virtual desktop experience by deploying and managing Azure Virtual Desktop (AVD) host pools, FSLogix profiles, and scaling plans.
- Troubleshooted Azure Logic Apps, Function Apps, and API/authentication issues to maintain high application availability across integrated services.

Technical Azure Consultant | Sonata Software Limited (Customer: Microsoft) Oct 2018 – Nov 2025

Payroll via TDI Solutions Pvt. Ltd (Oct 2018–Sep 2019), then directly with Sonata (Sep 2019–Nov 2025)

- Implemented cloud governance best practices across enterprise customer environments using Azure Policy, Management Groups, RBAC, resource tagging, and Blueprint-based landing zone structures to ensure compliance and operational control.
- Designed and deployed CI/CD pipelines using Azure DevOps and GitHub Actions, managing repositories, release pipelines, and branch strategies for smooth application deployments across customer environments.
- Implemented and managed ARM templates alongside Terraform for repeatable, auditable infrastructure provisioning aligned with enterprise governance standards.
- Configured and managed Azure Kubernetes Service (AKS), Azure Container Registry, and Azure App Services to enable modern application hosting for enterprise customers.
- Designed secure Azure networking solutions including site-to-site VPNs, ExpressRoute, VNet peering, Private Endpoints, NSGs, UDRs, and Azure Firewall policy configurations.
- Integrated Zero Trust security models leveraging Azure Entra ID, Conditional Access, Key Vault, Defender for Cloud, and workload identity strategies across multi-environment deployments.
- Set up and managed Azure monitoring and observability solutions — including Azure Monitor, Log Analytics, Application Insights, and Sentinel — with proactive alerting for production-grade workloads.
- Supported migration of enterprise workloads to Azure using Azure Migrate and ASR, including IaaS/PaaS rehosting and rearchitecting, as well as cross-cloud migrations from AWS and GCP.
- Provided advisory and enablement on Azure OpenAI solutions, helping customers define architecture, security models, and integration patterns for LLM adoption.
- Conducted technical architecture reviews with business and technical stakeholders, creating solution architecture diagrams (HLD/LLD) in Visio aligned with the Azure Well-Architected Framework.
- Applied FinOps principles to drive cost optimisation across customer Azure environments through Cost Management, Azure Advisor recommendations, and governance controls.
- Utilised Ansible for configuration management tasks and PowerShell scripting to automate Azure resource administration, patching workflows, and operational tasks.

EDUCATION

Bachelor of Computer Applications (BCA) | University of Rajasthan | 2017 | 68.8%

ACHIEVEMENTS

-
- Received multiple appreciations from Microsoft enterprise customers for resolving complex Azure queries and delivering high-quality advisory engagements.
 - Recognised with DNA Awards for outstanding team performance and consistent delivery excellence.
 - Received peer shout-outs for cross-team support, knowledge sharing, and driving cloud community-of-practice initiatives.
